8 mobile PPM & timesheet apps

⑧ mobile project management & timesheet were developed using HTML5 and Vue.JS and are handheld **device independent** and can run on both iOS and Android.

HTML5 apps are designed to function on the smaller screens of handheld devices. They can be used with any standard web browser.

HTML5 apps are an example of cross-platform development since they can work with any mobile platform, including Android, iPhone and Windows.

Vue.JS is a JavaScript framework for building user interfaces. It builds on top of standard HTML5, CSS, and JavaScript and provides a declarative, component-based programming model that helps you efficiently develop user interfaces of any complexity.

8 mobile project management and timesheet apps replace the old method of spreadsheet-based project and timesheet management, thus tremendously improving manageability and efficiency. Project and timesheet management are much simplified by mobile devices' easy and fast access to the needed data.

8 mobile project management and timesheet apps increase project and work time manageability and lead to much higher levels of employee, project and business efficiency. The results lead directly to improved overall customer satisfaction and business profitability.

8 mobile PPM & timesheet apps automatically generate up-to-the-minute reports for you.

Reporting (Cont.)

8 mobile PPM & timesheet apps can automatically generate the up-to-the-minute project progress and cost analysis reports for you.

Mobile PPM & timesheet apps Feature List

Feature	Description
Requires Action	
Require Action (Approval)	Support users to view and approve their own pending work items including: Group Announcement, Schedule, Form & Flow, Project Request, Project, Deliverable Internal Review, PMO, Timesheet.
Overdue	Support users to check overdue work items.
My Pending Requests	Support users to view and withdraw submitted requests.
Project	
View Project List	Allow users to view project list.
View Project Detail	Allow users to view project details, including Basic, Attachment, Approval, Cost, Deliverable, Issue and Risk.
Add Project	Allow users to add a new project, fill in basic information, and submit it for approval.
Add Activity	Allow users to add activities and their sub-activities to a project.
View Activity Detail	Allow users to view details of activities and their sub-activities.
Edit Activity	Allow users to edit the basic information of activities and their sub-activities.
Advanced Search	Allow users to search project through advanced search.
Deliverable	
View Deliverable List	Allow users to view deliverable list.
Add Deliverable	Allow users to add a new deliverable, fill in deliverable details, internal review, acceptance and submit for approval.
Search Deliverable	Allow users to search deliverable via advanced search.
Timesheet	
View Timesheet List	Allow users to view timesheet list.
Fill in Timesheet Basic	Allow users to fill in timesheet basic info including normal working hours and work category, and add comment.
Submit Timesheet for Approval	Allow users to submit timesheet after filling in basic info.
Withdraw Timesheet	Allow users to withdraw timesheet that is not yet approved.

PMO	
View PMO List	Allow users to view PMO list.
Add PMO	Allow users to add a new PMO, fill in basic info, link with project and submit for approval.
Search PMO	Allow users to search PMO via advanced search.
Virtual PMO	
View Virtual PMO List	Allow users to view virtual PMO list.
Add Virtual PMO	Allow users to add a new virtual PMO.
Form & Flow	
View Form Type List	Allow users to view form type list.
Add Form	Allow users to add forms of different types and fill in basic info before submitting for approval.
Business Trip	
View Business Trip List	Allow users to view business trip list.
Add Business Trip	Allow users to add business trip and fill in business trip details and submit it for approval.
EDMS	
View Library List	Allow users to view library list.
View Library Info	Allow users to view library info including basic page and document view.
Add Library	Allow users to add a new library.
Add Document	Allow users to add a new document to a library and fill in document details.
Note1: To use WeChat Official Account and Enterprise WeChat, you're required to use domain name that points to fixed IP and put on record of domain name/IP in advance.	
Note2: WeChat Official Account can only apply to 80 port (http) or 443 port (https).	
Note3: Existing Auto-Reply settings and Custom Menu configuration will be invalidated after Server Configuration is enabled.	

⑧ can provide best combination of standard products & redevelopment services for enterprise management and over 500 corporations in Asia are using our following modules on-premises or SaaS:
