

8 External System Integration

allows your teams to extend workflows, improve efficiency and enhance decision-making.

8 System Integration Framework

8 system integration framework can help by connecting 8 with different applications to create a unified functionality and data flow. This can in turn improve efficiency and scalability

Benefits of our customers resulted from 8 system integration includes:

- **Improved data access:** System integration can improve data access.
- **Real-time reporting:** System integration can provide real-time reporting.
- **Enhanced user experience:** System integration can improve user experience.
- **Greater productivity and efficiency:** System integration can increase productivity and efficiency.
- **Reduced manual effort:** System integration can reduce manual effort.
- **Better decision-making:** System integration can help make better decisions based on a more accurate view of the organization and users.

Interface Integration Method

8 Application Programming Interfaces (APIs) can help with system integration by enabling different applications to communicate and share data with 8.

01

Rich APIs

- RESTful Interface
- Web Service Interface
- Database direct connection
- Excel, CSV, Text and other file interfaces

02

Interface Module

- Supplier
- Purchase
- Financial
-

8 APIs can help with:

Automation:

APIs can automate routine tasks, which can save time and reduce human error.

Data consolidation:

APIs can help consolidate data from multiple sources, which can make it easier to analyze.

Workflows:

APIs can help connect multiple systems into a single workflow, which can improve accuracy and efficiency.

Collaboration:

APIs can help developers leverage existing functionalities and build upon them to create new applications.

Scalability:

APIs can help with scaling as data usage and needs grow.

Alerting and analytics:

APIs can help with diagnosing workflow issues and monitoring data usage.

8 Single Sign-on (SSO) Integration

8 single sign-on (SSO) integration allows users to access multiple applications and websites with one set of credentials.

Standard SSO

Other SSO

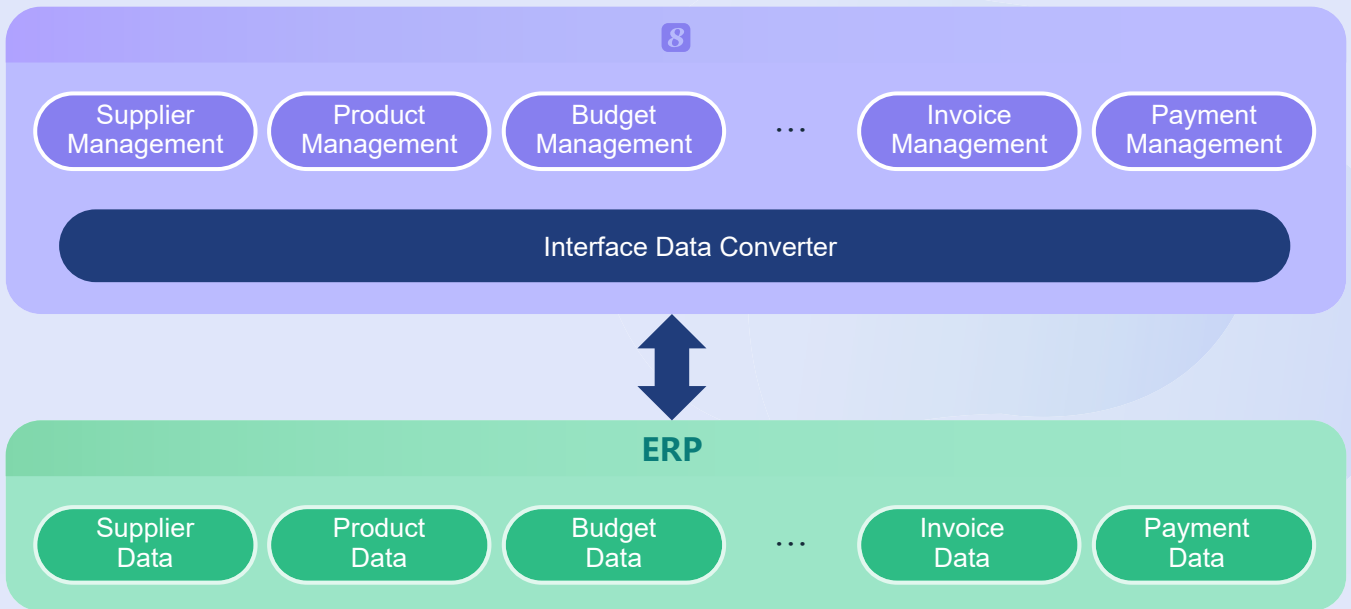

8 supports single sign on (SSO) with multiple interfaces:

- Windows Active Directory Domain (AD Domain)
- Central Authentication Service (CAS)
- Security Assertion Markup Language (SAML)
- Open Access Management (Open AM)
- Open Lightweight Directory Access Protocol (OpenLDAP)

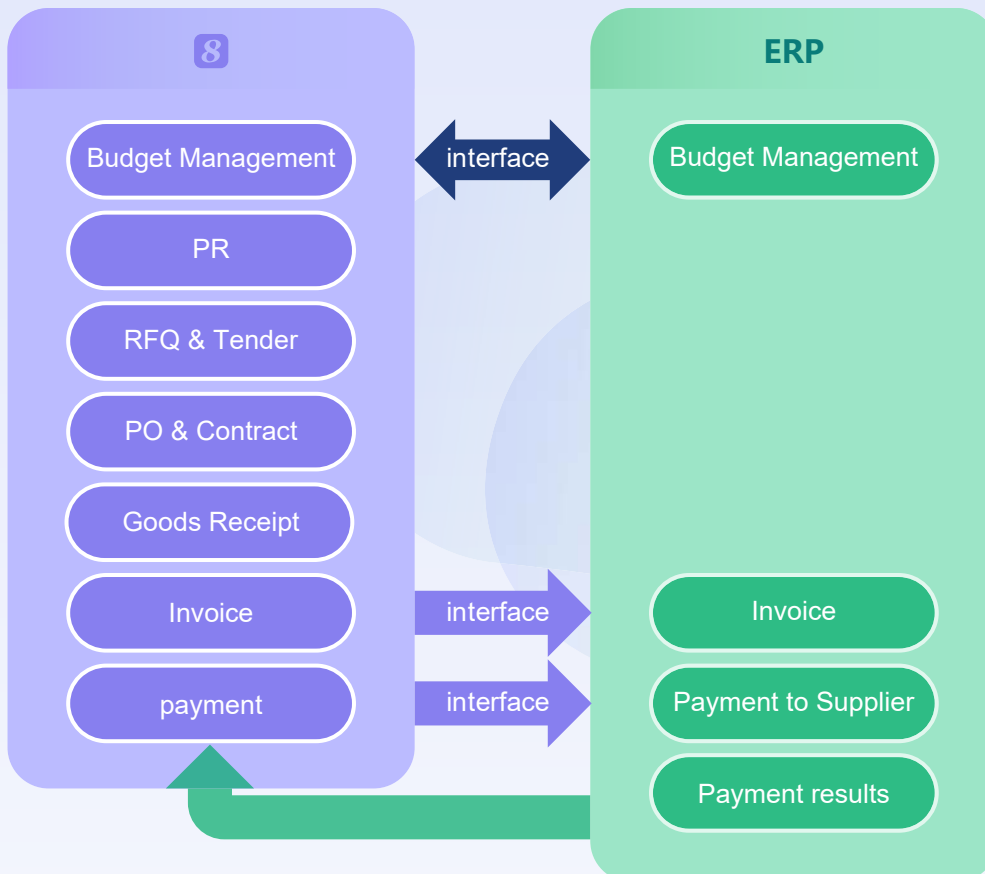

8 also supports customized integration with other third-party single sign on interfaces.

ERP Case

The following is a simple illustration of how to use APIs to integrate an ERP system with 8.

The following is a simple illustration of how data flow between the two systems.

Common ERP Integration

SAP

Sample ERP integrations:

- Fujitsu Hong Kon Ltd.
- Sunda International Group
- Ward Precision Technology Co., Ltd.

Yonyou

Sample ERP integration:

- Datang Telecom Convergence Communications Technology Co., Ltd.
- Jianye Construction Engineering Co., Ltd.
- Taizhi Technology (Nanjing) Co., Ltd.

Kingdee

Sample ERP integrations:

- China Business and Trade Co., Ltd.
- Shenzhen BTR New Material Group Co., Ltd.
- Shenzhen Tagen Group Co., Ltd.

Common Office Automation Integration

Jira

Sample Jira integrations:

- Hangzhou Arcvideo Technology Co., Ltd.
- KnownSec Co., Ltd.
- 深圳市爱德数智科技股份有限公司

OA

Sample OA integrations:

- Guangdong Yibang Logistics Technology Co., Ltd.
- Guangdong Huaxing Bank
- Infinitus (China) Co., Ltd.

8 can provide best combination of standard products & redevelopment services for enterprise management and over 500 corporations in Asia are using our following modules on-premises or SaaS:

8 CRM : Corporate Client CRM and Consumer CRM

8 Service : Service Management

8 SRM : Supplier Management, e-Procurement and e-Tender

8 PPM : Project and Portfolio Management

8 New Way : Visual Agile and Lean

8 Timesheet : Resource Time and Cost Management

8 EDMS : Electronic Document Management System

8 OA : Office Automation

8 HCM : Human Capital Management

8 All-in-one : Enterprise Full Automation
