# 8 Software Development Kit (SDK)

Faster software development and integration

SDK

🔢 provides SDK for your teams to integrate their apps to 🔢 services. 🔢 SDK includes documentation, application programming interfaces (APIs), code samples, libraries and Java Development Kit, as well as tutorials that your teams can learn to integrate into their apps.

Application Programming Interface (API)

🎱 API allows your team to save time by taking advantage of 🎱 implementations to do the nitty-gritty extension and redevelopment work. This helps reduce the amount of code your developers need to create, and also helps create more consistency across applications for the 🎱 platform.

🎱 API can control access to 🎱 platform resources.

Code Libraries

🎱 Code Libraries are the fully working 🎱 software that your developers can access to through 🎱 API.

Documentation

🎱 SDK Developer's Guide provides guidelines to help your developers create high-quality, consistent, and maintainable code on top of the 🎱 platform.

Java Development Kit

🎱 Java Development Kit （JDK） is a development environment for building applications, applets, and components using the Java programming language. JDK includes tools useful for developing and testing programs written in the Java programming language and running on the 🎱 platform.

Code Samples

🎱 Code Samples are "starter" code that illustrate the steps to perform a specific task and help your developers get started.

Tutorial Video

🎱 SDK Tutorial Video provides step-by-step instructions on how to do extension or redevelopment for the 🎱 platform using the 🎱 SDK.

⌷ can provide best combination of standard products & redevelopment services for enterprise management and over 500 corporations in Asia are using our following modules on-premises or SaaS:

⌷ **CRM** : Corporate Client CRM and Consumer CRM

⌷ **Service** : Service Management

⌷ **SRM** : Supplier Management, e-Procurement and e-Tender

⌷ **PPM** : Project and Portfolio Management

⌷ **New Way** : Visual Agile and Lean

⌷ **Timesheet** : Resource Time and Cost Management

⌷ **EDMS** : Electronic Document Management System

⌷ **OA** : Office Automation

⌷ **HCM** : Human Capital Management

⌷ **All-in-one** : Enterprise Full Automation
